## PREPARING YOUR CAR FOR COLDER WEATHER

Even in hot, sunny Arizona, the weather will start cooling down in the upcoming months. Though we're lucky enough to avoid below freezing temperatures and inches of snow, the drop in temperature we do experience requires changes to our vehicles. Whether you plan on staying in the moderate temperatures, or heading to Northern Arizona for colder weather, you'll want to follow these steps below:

- 1. Change your oil.**  
As our clothes become thicker in the winter months, so does our oil. Colder weather causes your oil to thicken, preventing it from properly lubricating your engine. Make sure your oil is lower velocity during this season.
- 2. Check your tires.**  
For every drop of 10 degrees, tires lose one pound of pressure. Avoid an accident by making sure your tires are properly inflated before hitting the road.
- 3. Replace your wiper blades.**  
Colder weather brings foggy windows, snow, and rain. Wiper blades should be replaced every 6-12 months. If you're using old blades, they won't do their job properly, giving you less visibility.
- 4. Have your belts and hoses checked.**  
Belts and hoses become brittle and break when the weather turns cold. Check that all of them are in good condition so they don't snap or give out during the winter months.
- 5. Don't forget about your headlights.**  
As the temperatures get colder, the nights become longer. Ensure that your headlight covers aren't cloudy or dirty so your visibility to other cars isn't compromised.

Bring your car in today to make sure you stay safe on the road through the fall and winter!

## TIP OF THE MONTH

**MAINTENANCE**  
for the life of  
**YOUR CAR**

**EVERY 3 MONTHS OR 3,000 MILES:**  
3 0 0 0

1. Change oil and filter.
2. Top off all fluids.
3. Inspect air filter.
4. Check tire pressure and inflate as needed.
5. Check all belts and hoses.
6. Make sure wiper blades are in good condition.

**EVERY 6 MONTHS OR 6,000 MILES:**  
6 0 0 0

1. Rotate tires
2. Inspect brakes
3. Make sure the car is ready for winter or summer.

**EVERY 12 MONTHS OR 12,000 MILES:**  
1 2 0 0 0

1. Align suspension.
2. Rotate and balance tires.
3. Install new wiper blades.
4. Install new fuel filter.
5. Clean fuel injector.
6. Get new cabin air filter.

**EVERY 30,000 MILES:**  
3 0 0 0 0

1. Complete full vehicle inspection.
2. Flush transmission fluid.
3. Service transmission filter.
4. Flush brake fluid.
5. Check battery.
6. Clean the throttle body.
7. Replace spark plug and distributor cap.

**EVERY 60,000 MILES:**  
6 0 0 0 0

1. Replace timing belt.
2. Flush power steering fluid.

## WHAT OTHERS SAY – A SAMPLE OF OUR ONLINE REVIEWS

Elizabeth G.  
9/3/16

Wonderful service in all aspects...AAA all around I will most definitely recommend and return for service! Thank you! Elizabeth(Libbie) Gibson

Maqbool H.  
8/20/16

Excellent Service

Heather S.  
8/19/16

The AC went out on our vehicle and Bridwell was able to get us an appointment same day and finished the work quickly. Everyone was friendly and the total bill was very reasonable. We will definitely return for service or repairs

Karen E.  
7/22/16

Bridwell Automotive fixed my rear Brake lights and socket yesterday and replaced an A/C filter. They perform excellent work and are very timely. they are very courteous and I have used them about 3 times this spring for assorted small repair items. Will continue to return.

## MAN VS MACHINE - GOOGLE SELF-DRIVING CARS

Robots are officially among us! Just last year, Google expanded its driving program into Arizona to see how the self-driving vehicles would respond to dust storms and golf-cart crossings in the metro Phoenix area. Have you spotted one around the valley? We have!
