5 TIPS TO SAVE YOU \$\$\$ AT THE PUMP

Maybe you're a road warrior for work or perhaps pleasure, or you just want to put more money in your pocket. Regardless of where you fall, you're likely among an ever-present rally cry among drivers to save some money on gas. I mean, when's the last time you heard someone complain they saved money filling up the tank?

But, until you can single-handedly dictate the price you pay to fill-up, because we're guessing that could take a while, we've got 5 tips to reduce the amount of gas you use and in the process save you money!

5 ways to save you money at the pump:

- 1. Keep your car running well.** Don't skip out on routine maintenance. Keeping fuel pumps, hoses and belts in check can ensure the most efficient drive, which saves you money.
- 2. Watch your speed.** The most economical speed is 55-65 mph. Any faster, and fuel efficiency falls rapidly. For example, driving at 85mph uses 40% more fuel than at 70mph.
- 3. Check your tire pressure.** Under-inflated car tires can increase fuel consumption by up to 3%, so check tire pressure on a regular basis.
- 4. Get a gas app.** Search for gas apps on your phone to help you find the gas station with lowest prices near you. Then consider a route that will take you near it to fill up for less. Lastly, don't drive till you're on E. An empty tank forces you to get gas at any price, not the lowest.
- 5. Make your miles count.** As you plan your day and week ahead, plan your errands and trips to include necessary stops along your route. Avoiding individual or last minute trips for groceries or other errands can help reduce your miles and save you money.

WHAT OTHERS SAY – A SAMPLE OF OUR ONLINE REVIEWS

A.M. 8/18/15 Status: Validated 
Great quick service with a full service gas station to boot. Best kept secret in the Scottsdale, Paradise Valley area.

Jason H. 3/7/12 Status: Validated 
When I moved to Tempe I was having trouble finding a good auto repair shop to take my car to, then a co-worker recommended Bridwells to me and that is the only place I will take my car to. They are very honest and have been a family owned business for over 40 years! I recommend all my friends to Jack, the service manager.

Valerie B. 7/20/10 Status: Validated 
My 22 year old Mercedes, has not even reached 100,000 miles. I garaged it while raising my kids, and have babied it for years. It drove the car recently from the Pacific Northwest to Phoenix. Other than it's normal maintenance, were issues of parts that...

Jim O. 5/18/10 Status: Validated 
I took my vehicle to Bridwell on Saturday asking them to take a look at it. When They opened the Hood and told me it wasn't drivable or I'd blow the engine one of the owners started calling rental car shops. I was really upset because this was the last...

Cindy I. 4/18/10 Status: Validated 
Terry was very accommodating and Friendly. They finished the van much earlier and for much less money than originally estimated or than any other quote form other automotive centers. It works great.

TIP OF THE MONTH

Saving Gas Beyond The Pump

Gas prices are expected to dip below a \$3 average. Multiply your savings by investing the money you save in vehicle maintenance.

Engine Performance Maintenance:

Keeping your vehicle properly tuned improves gas mileage an average 4%	Fixing a serious issue, such as a faulty oxygen sensor, can improve mileage 40%		
Tire Pressure Proper inflation can improve gas mileage 3.3%	Motor Oil The correct oil improves gas mileage 1-2%	Air Filter Replace a clogged air filter to improve vehicle performance	Gas Cap Damaged, loose or missing gas caps allow gas to escape & vaporize
